

**** Please answer all of the following questions in the answer sheet. (Total marks 50)**

Section One: Academic Writing:

1. Rewrite the sentences below using correct capitalization and state the reason for capitalization. (5 M.)

- a. my uncle is the manager of a chinese restaurant in portland, oregon.
- b. have you seen the movie splash currently playing at the rose moyer theater?
- c. "always do your best," mother said. "no one can ask for anything more."
- d. the presbyterians have a national meeting in the spring of every year.
- e. susan is studying russian during the summer at the university of kiev.

2. Write C if the sentence is compound, X for complex sentence and CX if the sentence is compound complex sentence. (5 M.)

- a. This exam will be more difficult than usual in that it covers two chapters instead of one.
- b. Since the bank closes in less than an hour, the deposits need to be tallied immediately.
- c. The software should be used on an IBM computer, and this computer is an IBM.
- d. Whenever you want to hold the meeting, we will schedule it.
- e. Until the registrar decides about your status, you must stay in an unclassified category, but you have to attend your classes.

3. Copy the following sentences on your answer sheet; Underline the independent clauses with a solid line, the dependent clauses with a broken line, and draw a circle around the subordinating conjunction.

- a. In the grove the overripe oranges were falling on the ground.
- b. The car listed in the advertisement had already been stalled
- c. It is impossible to enter that program if you lack experience as a teacher.
- d. While most students turned the assignment in on time, a few asked for an extension.
- e. The lifeguard will warn you about the riptides, or she may require you to get out of the water.

4. Write the outline of the following model and highlight the signaling words. (5 M.)

There are three important factors behind the increase in popularity of hybrid cars. A belief in environmental protection is perhaps the primary factor when people choose a hybrid. Hybrid cars use a combination of gas and other fuels such as electricity. Therefore, they consume less gas and release less carbon dioxide than cars with traditional gasoline engines. As a result, hybrids cause less air pollution and less harm to the environment. The second factor that drives consumers to buy hybrids is the desire to save money. With fuel prices on the increase, motorists are looking for cars with better mileage, and hybrids offer a good solution. For example, in city driving, a Toyota Prius can go 53 miles on one gallon of gas, but a Toyota Corolla with a traditional engine gets only 27 miles per gallon. Because hybrids use less gas, they are good not only for the environment but also for the wallet. The third factor that causes consumers to buy a hybrid is simply the cool factor. Certain car buyers like the idea of having an automobile with modern technology. They want to drive a vehicle that is new and different. Owning a hybrid makes these consumers feel special. In Conclusion, hybrid cars nowadays have a big share in sales of cars not only because of its benefits for the customer but also for the environment.

5. Write at least 250 words on ONLY one of the following topics. Pay attention to the organization of your ideas, vocabulary, grammar, punctuation and spelling. Do not forget to draw your mind-map and to highlight the signaling words. (15 M.)

1. More and more women are now going out to work and some women are now the major salary earner in the family. What are the causes of this, and what effect is this having on families and society?
2. There have been many advances in technology over the past fifty years. These have revolutionized the way we communicate with people who are far away. Compare and contrast methods of communication used today with those which were used in the past.
3. Being an engineer is a dream to a big number of students in the secondary school. As a student in the faculty of engineering give a definition of what an engineer is.
4. Using the emails nowadays is very helpful in the process of seeking knowledge, as a student tell your experience on how to email your course instructor.

Section Two: Reading Skills:

Read the following passage then answer the questions: (15 M.)

The bond between humans and computers is becoming more intimate than ever before. Scientists are now putting microchips inside people's bodies. They are made up of compressed electrical circuits that can detect and record data about the body. They are tiny, but they hold the equivalent amount of data as most computers.

A microchip is put to use inside a person with a simple procedure. First, a doctor must put data about the patient onto a chip. Input about the person's age, race, gender, and medical history is stored on the chip. The second phase of the process involves putting it in the person's skin. The doctor pinches a piece of skin and cuts a tiny hole with a tool shaped like a spiral. The chip is inserted, and the skin is allowed to heal. At last, it begins the task of putting data into its database.

Microchips scan the patient's body to record what is happening on the quantum level. They can find problems with the person's metabolism and organs. They can also detect viral infections. They can find the aggregate number of immune and infected cells and present the results in a ratio. They can even tell doctors what type of antibiotic to give to the patient! To recover the chip's data, the doctor uses a special magnet that copies it. This way, the doctor can put the information from the chip onto a computer. Then they can find out exactly what is wrong with the person.

The idea of putting chips in humans is still very new. However, it is now becoming more prevalent. Scientists and doctors are hopeful about the future uses of microchips. Someday, all new babies might get a microchip soon after they are born. Doctors will be able to know about any problems from the very beginning. It is obvious that medicine and computers complement each other well.

1. Answer the following questions:

- a. What does the doctor's special magnet do?
- b. What holds the equivalent amount of storage as most computers?
- c. After the input is stored on the chip, what is the next phase of the process?
- d. What do microchips do to record what is happening on the quantum level?
- e. What complements each other, according to the passage?

2. Mark each statement T for true or F for false. Rewrite the false statements to make them true.

- a. Microchips are made up of compressed electrical circuits.
- b. Chips express the aggregate number of immune and intimate cells in a ratio.
- c. Chips detect viral infections and problems with people's metabolism.
- d. A doctor pinches the skin and cuts a hole with a tool shaped like a spiral.
- e. Putting antibiotics in humans is becoming more prevalent.

Final Exam

Answer Key

** Please answer all of the following questions in the answer sheet. (Total marks 50)

Section One: Academic Writing:

1. Rewrite the sentences below using correct capitalization and state the reason for capitalization. (5 M.)

- My uncle is the manager of a Chinese restaurant in Portland, Oregon.
- Have you seen the movie Splash currently playing at the Rose Moyer Theater?
- "Always do your best," Mother said. "No one can ask for anything more."
- The Presbyterians have a national meeting in the spring of every year.
- Susan is studying Russian during the summer at the University of Kiev.

2. Write C if the sentence is compound, X for complex sentence and CX if the sentence is compound complex sentence. (5 M.)

- X Complex.
- X Complex.
- C Compound.
- X Complex.
- CX Compound Complex

3. Copy the following sentences on your answer sheet; Underline the independent clauses with a solid line, the dependent clauses with a broken line, and draw a circle around the subordinating conjunction.

- It is impossible to enter that program if you lack experience as a teacher.
- While most students turned the assignment in on time, a few asked for an extension.
- The lifeguard will warn you about the riptides, or she may require you to get out of the water.
- In the grove the overripe oranges were falling on the ground.
- The car listed in the advertisement had already stalled

4. Write the outline of the following model and highlight the signaling words. (5 M.)

Topic Sentence: There are three important factors behind the increase in popularity of hybrid cars.

Supporting Detailed Major Sentence A: A belief in environmental protection is perhaps the primary factor when people.

Supporting Detailed Minor Sentence 1: Hybrid cars use a combination of gas and other fuels such as electricity.

Supporting Detailed Minor Sentence 2: Therefore, they consume less gas and release less carbon dioxide.

Supporting Detailed Minor Sentence 3: As a result, hybrids cause less air pollution and less harm.

Supporting Detailed Major Sentence B: The second factor that drives consumers to buy hybrids is the desire.

Supporting Detailed Minor Sentence 1: With fuel prices on the increase, motorists are looking for cars.

Supporting Detailed Minor Sentence 2: For example, in city driving, a Toyota Prius can go 53 miles on one.

Supporting Detailed Minor Sentence 3: Because hybrids use less gas, they are good not only for the.

Supporting Detailed Major Sentence C: The third factor that causes consumers to buy a hybrid is simply the cool factor.

Supporting Detailed Minor Sentence 1: Certain car buyers like the idea of having an automobile with modern.

Supporting Detailed Minor Sentence 2: They want to drive a vehicle that is new and different.

Supporting Detailed Minor Sentence 3: Owning a hybrid makes these consumers feel special.

Concluding Sentence: In Conclusion, hybrid cars nowadays have a big share in sales of cars not only because.

5. Write at least 250 words on ONLY one of the following topics. Pay attention to the organization of your ideas, vocabulary, grammar, punctuation and spelling. Do not forget to draw your mind-map and highlight the signaling words. (15 M.)

The answer may vary according to the different styles of writing of the students but it should be organized with correct vocabulary, grammar, punctuation and spelling in addition to including the mind map.

Section Two: Reading Skills:

Read the following passages then answer the questions: (15 M.)

1. Answer the following questions:

- a. To copy the data from the chip
- b. Microchips
- c. Putting it in the person's skin.
- d. Scan the patient's body
- e. Medicine and computers

2. Mark each statement T for true or F for false. Rewrite the false statements to make them true.

- a. T
- b. F Microchips
- c. T
- d. T
- e. F Putting microchips in humans is becoming more prevalent
